

Consumer Solutions

- Do you know that there is a gold mine of data in your computer that ordinary software cannot reveal to you?
- How do you know for sure that your personal data in your old hard drive is actually deleted?
- How are you preventing identity theft and your data from falling in the wrong hands?
- How do you recover your lost or corrupt data and hard drive quickly?
- How do you know that your anti-virus software is detecting malicious software ("malware")?

NetSecurity Forensic Labs is how! NetSecurity is now offering you the same solutions that we provide to law firms and corporations with our Consumer Forensics Solutions. Privacy and peace of mind can be yours today!

Hard Drive Erasure and Disposal:

- Forensic and secure erasure of your data in any storage device (Computer, PDA, Mobile devices, etc.)

Data Recovery:

- Recover lost files and data

Computer Forensics:

- Gather, analyze, and preserve digital evidence
- Recover hidden, deleted, or encrypted files
- Perform deep forensics analysis of malware, Trojans, or other hostile software
