NetSecurity's Certification Training Benefits

- Instructors' combined security certification exam PASS rate on previous training is 100% (Note: We do not guarantee that a student will pass)

- Live classroom instruction with interaction with instructor(s) and other students

- Training includes hands-on exercises to demonstrate complex theoretical topics and to further improve content retention

- Seasoned expert instructors with real-world hands-on experience who are current on emerging trends, threats, challenges, and topics

- Accelerated delivery system enhances knowledge retention through rigorous test-taking sessions that are representative of an actual certification examination

- Students obtain a personal critique of individual practice exercises to help identify areas of weakness, ensuring that emphasis is placed on problem areas

- Available instructor(s) to provide a 30-day FREE support and guidance on taking an exam

I look forward to attending more of NetSecurity's Hands-On How-To training courses."* *-- Principal Consultant, Major Federal Integrator* *"The instructor provided simple, straightforward discussions of the CISSP topics. He was willing and able to explain any subject in sufficient depth to make it understood and to provide real-life examples from his significant experience. I would highly recommend any course taught by the instructor. Thanks for all the help… I wouldn't have passed without it."* *-- Managing Partner, Security Consulting Firm*
