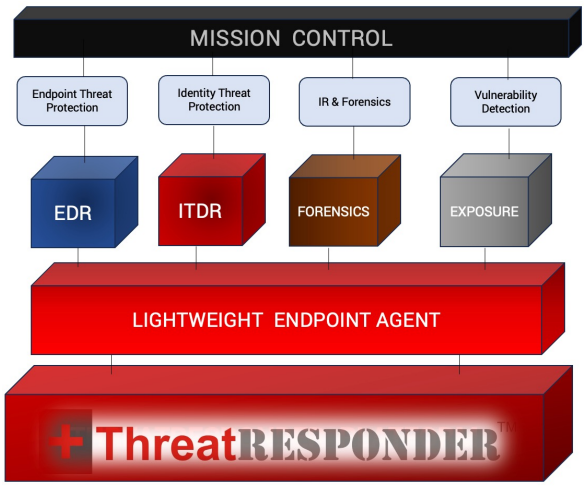
ThreatRESPONDER™

PREDICT, STOP, & INVESTIGATE ADVANCED CYBER ATTACKS

AV comparatives 99.2% Malware Protection Rate

ThreatResponder® Platform is an AI-powered and cloud-native **cyber resilient endpoint platform** for protecting enterprise computer endpoints from advanced cyber attacks and data breaches, detecting security vulnerabilities, and conducting legally defensible remote forensics investigations at scale.



Key Differentiators

- ❑ One platform with multiple cyber capabilities—threat protection, incident response and forensics investigation, and vulnerability detection—all on a single pane of glass
- ❑ Conducts remote enterprise incident response and deep forensics investigations that withstand legal scrutiny
- ❑ Used by an American A-rated insurance carrier for breach warranty of $1.5M (USD) per occurrence

Key Benefits

- ❑ Quickly detect and mitigate cyber threats
- ❑ Conduct digital forensics investigations at scale
- ❑ Gain regulatory compliance and avoid fines
- ❑ Protect your intellectual property and maintain competitive advantage

Endpoint Threat Protection

- ❑ Detects and prevents advanced attacks leveraging threat intelligence, MITRE ATT&CK techniques, and Machine Learning (ML) algorithms
- ❑ Mitigates threats by isolating infected or compromised endpoints and terminating malicious processes and network connections

Forensics Investigation

- ❑ Performs incident response and forensics investigations of endpoints at scale
- ❑ Performs automated malware analysis with the click of a mouse

Vulnerability Detection

- ❑ Detects CVEs and zero-day vulnerabilities in real-time — without scanning your systems
- ❑ Provides situational awareness of your applications and OS vulnerabilities

Identity Threat Detection and Response

- ❑ Detects identity threats, including credential misuse, unauthorized account creation, privilege escalation, and lateral movement
- ❑ Detects suspicious user behavior, including unusual logins and abnormal data transfers

netSecurity®

NetSecurity Corporation is a leader in endpoint threat protection, vulnerability detection, and computer forensics. Our mission is "*to predict, stop, and investigate advanced cyber attacks and data breaches.*"

Developed by **NetSecurity Corporation**, **ThreatResponder® Platform** is an AI-powered and cloud-native cyber resilient endpoint platform for protecting enterprise computer endpoints from advanced cyber attacks, detecting security vulnerabilities, and conducting legally defensible remote forensics investigations at scale. ThreatResponder enables enterprises to predict, stop, and investigate advanced cyber attacks, data breaches, and insider threats launched by sophisticated nation-state adversaries or insider threat actors.
